DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The examiner agrees with those amendments and arguments presented by applicant on 11/29/06 as well as the terminal disclaimer filed 1/16/08 overcoming potential obviousness type double patenting over US patent 6,599,872.
3. In particular the applicant has amended the claims to now require 1) that the foam has a pH opposing that of the hazardous waste; and 2) the foam is not only slow draining but also drains slowly during the treatment.
4. The prior art fails to teach this specific combination of features. The closest prior art to the current amendments would be the Norman et al reference ('991). The examiner agrees that Norman is teaching a permanent foam that is not meant to drain slowly but instead form a permanent-solid barrier to the hazardous material. In contrast the instant invention is specifically intended to form a transient foam which drains and neutralizes the liquid waste below the foam layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory E. Webb whose telephone number is 571-272-1325. The examiner can normally be reached on 9:00-17:30 (m-f).
